Showcase description

My name is joy until I was 14 years old did not know what was the graphics, I swear I had no clue, right from school not shown an admiration towards the study and what represented the school, there was only an obligation to me, I had no particular interests no matter, wandering the corridors without really thinking about what I knew to do, for me I had no concrete existence While I saw my classmates filled with dreams, I was living in them, not ever wondered what is a dream? an objective ... I did not understand the reason for the question, why face this question ... who cares have a dream or less .... but when I returned home I in my room I was living my dreams, my imagination was out, I was living in the clouds and I was taking around this. Ended the averages here! decide the school ... where to go? all decided and I don't ... I didn't know what to do and where to go ... I lost ... I was afraid because the above are really awful if you don't choose the right one. I tell you ... I was about to click the wrong one! then one day looking for a folding case ... I saw a Word ... Advertising Graphics ... Jeez, I incuriorsì, I thought what is it??? never heard ... I hadn't the slightest idea what it was, and even there I enrolled I thought balls ... is bullshit ... but instead I was wrong since then Realized, I was enlightened, graphics was my life ... Since my birth until now! He understood that everything I did had a reason to come to this ... my brain I find its size.Now I am a graduate and I'm a graphic and web master, I want to continue this path that God has set apart, a special way that allows you to see better things that so many fail to see. And here I am.
