Showcase description

We are a creative studio specialized in photorealistic and high quality 3D rendering. We started as a photographic studio, and then, for several years now, we have devoted ourselves almost entirely to 3D: our background of traditional photography has helped us a lot in defining our style and has allowed us to approach 3D rendering with solid technical foundations. We specialize in the creation of photorealistic 3D environments and still-life product images. For several years we have been working with high profile companies, which have allowed us to refine our technique and improve continuously: Whirlpool EMEA (Whirlpool, Bauknecht, Indesit), Riello Group (Riello, Beretta, Sylber, Thermital), Nobili group (Nobili rubinetterie, Stella 1882), Gessi, WTS Group, Novartis, Metro Cash & Carry Italy, and many others. Along with 3d rendering we also carry on traditional photography and videomaking for passion. Thanks to the experience gained over time and the problem-solving approach, we are able to deal with any project, always offering the best solution, both in terms of yield and costs.
