Showcase description

Alessandro Barciulli architectural design workshop, operates mainly in the context of architectural design, graphic design and urban planning; follows with its structures all the stages from design to realization. For Family tradition, the Firm performs technical consulting and it offers tecnichal skill in building sector and in topographic sector, coming to offer customers technical knowledge to 360 °. The Firm deals with the management of the project for both public and private customers; follows the work step by step, from preliminary studies and preliminary design, to the detailed design of each particular of the construction, to construction management and construction site and it provides, at each stage, the skills needed to complete the opera realization. The Firm uses new methods of representation, such as solid modeling and rendering photorealistic three-dimensional, providing, in this sense, a valid support for the control of the project in all its phases: so it is possible entering the environment, for doing the choices of materials and color, of the surface treatment, of the choice and arrangement of the furniture in the perfect location and sizing of the light sources.
