Showcase description

Since 1998, when I get my diploma at the European Institute of Design (Turin - Italy), I worked in all the fields of drawing. I attended illustration courses with Massimiliano Frezzato and Pia Valentinis, and an animation course at "Lanterna Magica" in Turin (Italy) I worked for animated cartoons, taking part in the making of "Lucky and Zorba" (a Lanterna Magica and Cecchi Gori Group production) and some animated series. I illustrated children and school books for De Agostini, Raffaello, Elle Di Ci, Gribaudo and Lazzaretti Edizioni and some else in Italy; MightyBooks, DragonPencil, Outskirtspress,10to2childrensbooks in USA, and in many other countries in the world. I realized advertising pictures for a lot of very important italian agencies: Ferrero, Novartis, Caffarel and more? I created images for greeting cards, cd-roms, ebooks and apps. I have a big portfolio on the major photostock sites in the world. You can see the complete list on the homepage. http://www.illustration-art.net
