Showcase description

I?m Francesca Sanfilippo, and like to define myself as a Visual Artist. Let me clarify: I use ?Visual? because I?m very passionate about all visual arts and during last years I used interact design to merge all senses, and I use ?artist? because I love my work and I think that being an artist means being passionate in everything I do. I wanted to create something beautiful, with more creativity and inspiration. I did many changes in order to achieve this, and I am not afraid to do more
