### Showcase description

I am an excellent all rounder 3D Artist with a very keen and artistic eye for details. I'm capable of producing complex 3D models, both organic (characters, animals, monsters...) and not organic (environments, props, mechanical...). I am a good character animator too, and I've got a good knowledge of mid level rigging and setup techniques. My own artistic skills allow me to be an excellent texture artist and digital painter: I've no problems with human anatomy and proportions, colors, shading and lighting. My problem solving skills make me able to be very useful whatever the work has been assigned. I feel comfortable in both technical and artistic branches of computer graphic field. So my ideal workplace could be the one which allows me to express my own skills at their best, a place where I can work in a good team and help them to reach the goal giving the best of me.
