Showcase description

G. & M. Allestimenti is an Italian Company with proven experience in stand constructions in Italy and abroad. We have an internal design studio which can take care about your corporate image, offering drawings and quotations of your stand with no-commitment. We are specialized in building modular and wooden stands, with various customizations available to satisfy all your needs: from the simplest and cheapest to the most scenographic and unique. We also have a lot of options to decorate and lighting, for example americana aluminum trusses. We can also provide graphical products of any type (adhesives, PVC canvas, forex panels, backlight panels, plexiglass and much more) in order to increase the value of your stand. If you want to study our work in deep, please visit our website www.giemmeallestimenti.info to see the photos of some stands and the list of the Exhibitions where we built our stands. Our materials are always delivered with the relevant forms of fireproofing from the Interior Ministry Civil Defense. Temporary electrical installations realized by our staff always include certifications.
