Showcase description

after the graduation I began to do work experience in graphic design studios and printers, acquiring technical expertise, which is responsible for the prepress department and creative work in graphic design studios. While working in the studio, I had the opportunity to work with Fantastic photographs, I was fascinated by the colors, cuts and appassionavo me even more, each time we performed a photographic retouching, to improve saturation, conrasto, the brightness, to make the photo more beautiful and compelling. From there I started to develop my passion for photography, to accompany to my knowledge of graphic design and editing. Finally decided to buy a decent car to give vent to my desire to photograph, and bought one: CANON EOS 40D with Canon EFS 18-55mm f/3.5-5.6 IS lens with stabilizer Canon Speedlite 430EX II - Canon 50mm 1.8 - Sigma 8mm f/3.5 EX DG lens Wide Angle - Stand with spherical head, 360 head Precisiion Atome, Nodal Ninja Ultimate R10 with compact 90 ° (for panoramic photos) After this brief history of my professional career, I can say that he has acquired a important experience in the field of photography, and as a graph, but also as a photographer.
