Showcase description

Dear Dr., with this submission to his attention my curriculum vitae, making me available for an interview. My name is Matthew Pellizzato, I'm 25, have a degree in Urban Planning and Territorial Sciences at IUAV and I have a post-graduate certification in Autodesk Certificate of Completion "Autocad 2012". My professional goal is to take care of for the arrangement and construction of buildings, public spaces, street furniture, services and amenities. Urban design is the process of giving shape and character to groups of buildings, neighborhoods, and finally to the city. During the period of study, I conducted several activities including an internship here in public administrations and some internships in private practice in Castelfranco Veneto and Venice that allowed me to learn the techniques and procedures of design-implementation of measures related to the field of 'urban planning, construction and architectural design. At the same time I have worked with various private practices between here: Studies Architectural, Urban Design and planning to carry out activities related to the graphics, to the representation bi-dimensional and all 'analysis of the study of the territory. Inspired by these experiences are currently looking for employment in a large company like yours, which operates at national level, to enrich my skills in the field. Are immediately available in different contractual arrangements and transfers on the whole territory
