**Showcase description**

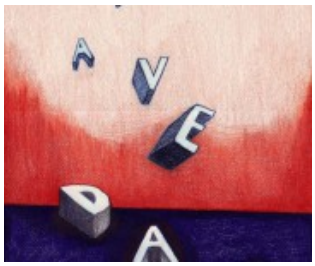

I´m an chilean sequential artist and illustrator. I got a degree of illustrator in Professional Institute Arcos at august of 2012. I was studying Graphic Design before in Universidad Finisterrae, but I left that because I thought that wasn´t for me. I have goods skills for Children Illustration, I have skills for making a comic entirely by me (script, pencils, inks and lettering), although I´m more a drawer than a scriptwriter, my knowledge of scripts is basic. Photoshop is the software I best know to use. I can use other softwares as Indesign, After Effects, Illustrator, and Sai, in a basic level. I have two styles: a cartoonist style proper to Children Illustration, and an amerimanga style (mix between american comic and "manga" or japanese comic). I made my professional practice on an art gallery called "Taller de Rokha" and after that I worked there for 5 months more, making works of Illustration and Graphic Design. I left working there for a breach of payment by the company. I worked for Productora H2O too in that period. I´ve made many freelance works until now. I´m looking freelance works in the field of Sequential art or Comic, works as illustrator or works as storyboard artist.
