**Showcase description**

CRISTALPLANT is a technologically advanced and unique compound, made up of high percentage of mineral extenders from nature (ATH derived from bauxite) as well as a small one of high-pureness polyester and acrylic polymers; therefore, it is an inert, hypoallergenic and non-toxic material. CRISTALPLANT is a ?solid surface 100% made in Italy? as it was designed, patented and produced at the R&D Centre of Nicos International?s Italian headquarters located in Portobuffolè, in the Province of Treviso. CRISTALPLANT is 100% recyclable, practically fireproof (class 1), strongly UV-resistant, solid and non-porous, hygienic and healthy, resistant and agreeable to the touch for its velvety and natural stone-like finish. CRISTALPLANT is 100% restorable, i.e. it can bring back the original state and look by simply using an abrasive sponge and a detergent, thus removing even cigarette burning rings. These properties of durability and restorability make it an ecocompatible material.
