Showcase description

"Lost souls, dolls wounds, mutilated, armed with stuffed animals and cupcakes. Undisputed queen of a dream world and fairy-tale. " The project "Ohmydolls!" Designed by sisters, Rosanna and Ilaria Vista, respectively artist and architect born from the passion has always cultivated the art in all its forms, from the need to represent a new feminine ideal, describing an icon melancholy and disenchanted, proudly displaying the scars of wounds inflicted by life and those scrolls and instead told by tattoos and piercings, all in a dream and fairy tale. The contemporary and socio-cultural events evolve in a new direction: hard-working and independent women who do not renounce femininity, nor romance, albeit dramatic. From this concept develop works of art and the desire to convey their meaning through alternative channels, the intent is to find every single emotion evoked by the framework in other contexts beyond the purely artistic.
