Years of Experience: >10

Employment Search: Si

Internships Available: No

Showcase description

I'm 33, and I'm a Graphic Designer. Something specific? Working in graphic design for the past ten years since I graduated in Communication Design. After a first experience in an agency of Communication (www.archi3.it) where I was able to range from graphic print to the web, I was hired in Cadey Srl (www.cadey.it) known Italian company operating in the Personal Care acquired in 2013 by the group Manetti & Roberts. During his years in the division Cadey & Graphic Communication I worked for the graphic designer of the brand, the development of packaging for various product lines, materials and POP advertising. Therefore, I have developed good skills in executive work from the brief for the project, as well as coordination of suppliers and external agencies. Today I want to use my experience to start my own business.
