Showcase description

I am a young Italian graphic, design and color are part of me always, I continually tried to pursue my dreams and passion through the study. Always cultivate my passion for drawing, for art and its history. My artistic studies began in 2003 at The Institute Of Art V. Bellisario Avezzano (Aq) where for the first two years I took a course of generic training and then specialize in the three years following the Restoration and Cultural Heritage. Determined to continue his studies in 2008, I started attending the Academy of Fine Arts of L'Aquila, enrolling in the course of Graphics and Multimedia Design. In 2014 I obtained a degree with 110 votes and praise, creating a graphic design-play for an archaeological museum. I can work in any field of graphics, but they are specialized in illustration, publishing, recording, I have good skills in photography and vector illustration. I have skills in design and implementation of graphics such as trademarks, coordinated business (business cards, letterhead, envelopes, stamps), catalogs, brochures, leaflets, posters, flyers, magazines, promotions, packaging, equipment.
