Showcase description

COMPANY PROFILE I am a professional in the field of communication and can provide the following services: graphic design, web design, logo design and video editing. My services are oriented to all professionals, companies, public and private, who have chosen to create or modify their own image advertising or business. I firmly believe in clear communication with the customer, in compliance with the handshake (with the requirements provided?). Quality can be achieved when the customer and supplier both understand what the customer would like to achieve. We will use our technical expertise combined with strategic and creative solutions to add value to your image. **Logo Design** The first and most important system of instant communication. Logo designs are all around us. To the general public, logos serve as an instant reminder of a company or a product; to the client they're the point of recognition on which their branding hangs. **Layout & Print Design** Create innovative solutions for typesetting brochures, leaflets, flyers, manuals, brochures, catalogs and everything related to the editorial publications, posters and billboards, for innovative advertising campaigns designed for newspapers and magazines. **Web Design & Development** Graphic design, choice of content, navigation and high interactivity. The main goal in the creation of a website is to gain a strong emotional involvement with the public, therefore awareness of the fundamental role played by the web in communication and effectiveness of online communication is key. **Video Editing** Viral videos distributed on the web or TV, business presentations, guides, courses, documentaries. Motion pictures and the environments are formidable vehicles for each type of advertising thanks to the innate ability to attract the attention and the immediacy of communication.
