Showcase description

Hi, I'm an experienced Web & Graphic Designer, with studies of Brand Communication and Marketing. I work with several Advertising Companies of my region, but I want to expand my horizon :) I like communication in every form, from the graphic sign to the word. I candidate myself for both traditional graphic works (like logo design, brochure, catalogue ..), and website realization (from the draft to the development) till the writing of press release, naming, or payoff for your advertising, always with a huge attention to the marketing aspects, because in brand communication the graphic can not be an end in itself.
