### Showcase description

Today, GRUPPO ARREDOSTAND is structured in 5 departments: RETAIL SHOP IN SHOP EXHIBITIONS AND EVENTS BARS AND RESTAURANTS INTERIOR DESIGN We work with companies such as Media World and Saturn as well as Brands such as Apple, Nintendo and Whirlpool... Gruppo Arredostand fully covers all process phases: from listening to the client's first briefing up to final assembly of structures, and any maintenance and after-sales storage. TECHNICAL OFFICE - PLANNING AND DESIGN At Gruppo Arredostand, planning means knowing how to interpret the client's requests: in the materials, style, technological solutions and engineering. Thanks to the 3D rendering techniques, our architects and designers give shape to ideas and can obtain an exact assessment of the final result of the project quickly. PRODUCTION WORKSHOP Gruppo Arredostand engineers each project and creates it in its own Production Workshop. Equipped with state of the art automatised work centres and specialised resources, the Workshop is able to manage any type of material and exhibition structure. The internal production spaces also allow for the creation and monitoring of exhibition structure prototypes before launching high-volume production and can keep serial productions in the warehouse in order to manage incremental releases over time.
