Showcase description

I was born in Tempio in 1994 , I always had a passion for the arts . I studied graphic design but I could not express my idea of art up to 1 year ago . After studying I am passionate about photography and consequently digital art (which I love) I work as a freelance in my beautiful island Sardinia , collaborating with other companies and freelance like me. I love what I do because it allows me to work with professionisti around the world and then to increase my cultural background.

Photo editing and photomanipulation
