Showcase description

Hello everyone, my name is Erica, I'm 29 years old freelance photographer based in Florence, Italy. I have always been fascinated by photography as a teenager and I started to picture the world with my camera combining my two other passions: travels and music. I've been working as a photographer for 6 years, first in collaboration with local clubs and event organizations across Tuscany then opening a digital and analog prints store. In 2016 I opened a professional photographic studio in Empoli, nearby Florence. The style of my photos reflects my personality: I am an old soul looking sympathetically to the modern world. I love the refined taste of the Victorian era, the pomposity and the eccentricity of the baroque blended with the austerity of the Gothic period. I try to create images with fairy-tale settings, some more mysterious and bizarre and others very minimal and modern, but always a little "retro". My goal is to help people create special images and fall in love with them.
