Employment Search: Si
Internships Available: No

### Showcase description

Always in love with drawing, for a long time I have cultivated a passion for manga comics. For years I have specialized in the field of illustration for children, a sector in which I work with dedication to establish myself. For the realization of my illustrations I prefer digital support, however, I appreciate brushes and colors, which were my tools while I was taking my first steps in the world of drawing. I actively collaborate in the creation of illustrated books and graphic projects, for posters, covers and pictorial decorations. On request I create single illustrations, often used as a decorative element for objects of various kinds. I love creativity, original projects and extravagant ideas. If you can imagine it, you can create it. If you have a dream or a project contact me, and together we will make it come true. www.giorgiavallicelliart.com www.instagram.com/fairyworld_illustrator www.tiktok.com/@fairyworld_illustrator
