### Showcase description

I'm a student and I study at the first academic year of Graphic Design. My aim is to develop in this sector, shaping better my graphic and creative abilities, enriching my professional figure learning and using other special programs useful to the graphic designer, like the 3D projection or the app projection. I don't put limits to myself, most i learn, most i know and most i practice, better is for me and for my future costumers!
