Years of Experience: < 5
Employment Search: Si
Internships Available: No

Showcase description

I?m a creative young designer specialized in Interior Design and Toy Design. Interior and Toy design only? Not at all. Design is in everything and everything is design. Shapes, colors, sounds, smells. Design is the right mix of them all with a touch of creativity. My background comes to design. By studying both Product and Interior Design, with a master?s degree in Design for Kids and Toys, the design has become my everyday life, but I largely devoted to study and practice in Graphics and Photography, grown both through courses and himself insights. Recently I had the opportunity to develop my skills working as a graphic for individuals and companies. I always used dedicated programs like Adobe complete package. The graphic elements are something that have always fascinated me. I do not want to stop. My passions, what I have inside, I want to get out, I want my next work is the expression of myself. Because everything I've learned, everything I'm still learning and all that I will learn, it must be expressed.
