Showcase description

I?m Giulia Nasini, an italian emergent artist. I?m starting getting experience as an Artist and Illustrator, after attending the Academy of Fine Arts. My main techniques are black and white ink, watercolors, coloured inks and pencil work. My favorite subjects are mostly natural and human figure, while my favourite themes at the moment are fantasy stories and characters design. In my current role as a Freelance Illustrator I worked with privates to determine their needs, sketch their ideas for review and then create a finished product. I?m working expecially with non-fiction pieces like portraits and scientific studies, but I've started working with fiction and artworks for album fronts. These illustrations are used for various purposes, like for example artworks for companies, home decor and personal artwork to be purchased in my own online shop.
