Years of Experience: 5-10

Employment Search: Si

Internships Available: Si

Showcase description

I'm Massimiliano, an engineering and architecture student, passionate of well-designed building detail. In recent years, I also specialize in graphic design, creating a wide range of graphic products (logos, brochures, business cards, etc ...) for various buyers around the world. I like the research and the quality, so all my projects, graphic and architectural, are expressive and always a concern for the needs of the most demanding commands.
