Showcase description

My name is Andrea and I'm 25 years old. I study marketing and communication in my beautiful city Venice, Italy. After that I decided that digital communication was my life so I take a Master after graduation in Web marketing & digital communication. Tired to stay at home and only study I began to work with an internship in a beautiful real estate near Venice called Venissa. Here I follow the communication on social media and with the journalist at the island. With my work in the agency and especially in the Camping Village company I follow the all social media process, from planning the editorial calendar until the publication and the analysis of the results. In the last work I manage a little team with other 2 person and it was the best experience ever, see how much you can learn to other people it's incredible. I'm a very organize person, I made list for everything so I'm sure to don't forget nothing. I like the new challenge because I can do my best in a new situation. I begin to work with my personal Instagram profile and I see some result in a little time so I decide to try to candide myself to this job to have the opportunity to work but traveling at the same time.
