After high school, he enrolled in the commercial art course at the humane society in via Daverio in Milan with teachers like Albe Steiner. In 1980 starts his adventure by graphic designer entering at Agency Studio Music in Milan dealing with making storyboards for major advertising spots; After the experience in Milan he moved to Romagna in 1995 and started a fruitful cooperation with agencies in the territory of Rimini. His Pop Art style was born in the mid '80 after several studies on art design, develops a kind of mechanical writing to then get to make and decorate various media such as paper, cardboard, canvas but also 3D objects in various materials, such as ceramics, wood. His style is fresh and modern, seemingly superficial but it is actually a rework, give new life to seemingly insignificant objects. Facebook page BYRO ART.
