Showcase description

MANOEL MOZZONE born in Brazil in 1985. From the early childhood to test his creative abilities by exploiting his plastic construction games to create real colorful compositions, becoming for many the growing creative genius. He decided to follow his aspirations by attending, first of all, the artistic high school and then the Academy of Fine Arts achieving in 2010 the degree in decoration with honors making his first three-dimensional works entirely in paper that still represent his, not unique, means of communication with the world that surrounds it. His works become the perfect interlocking of paper forms that gradually take shape until they become the expression of an originality typical of Oriental art alone. Creative at 360 degrees, his innovative spirit has led him, in recent years, to get closer, too, to the world of photography making it able to wander between one style and another focusing not only the camera but also the wit in search of the perfection of a shot full of originality. He defines himself as a creative artist capable of molding matter in relation to his fantasy. Not only skillful in practice but also in theory. Continuously growing, looking for perfect lines in this contemporary world
