Years of Experience: 5-10
Employment Search: Si
Internships Available: No

Showcase description

Hello, My name is Stefano Loreni, I am an engineering graduate and I am currently in charge of communication and customer management at the facility where I work as an employee. I also work as a freelance Video Maker and Video Editor for individuals and agencies. Today my goal is to devote myself entirely to video making and multimedia communication. Over the years, after graduation, I attended several training courses, including that of film directing at the Mohole school in Milan, that of Visual Effect 2D on Adobe After Effects and Adobe Premiere software.
