Showcase description

Francesco&Veronica, a videomaker and a photographer with a specific aim, travelling with a positive attitude to discover the world through new eyes. We personally look after the content on our blog, gather together useful tips for travellers, prices and itinerary we create after every travel experience. We also create visual content, remarkable photos and videos in order to advertise destinations and tourist attractions. We love digging into the places we visit in order to live their real essence, tasting new foods, meeting the locals, learning stories about the place and its culture background. We would like to propose ourselves in order to be collaborating with brands and companies, who wanted to create efficient and productive advertising campaigns.
