Showcase description

"Live the excellent life" is not just a motto, it's a promise. Higold, through its outdoor furniture collections, wants to provide its customers with a better lifestyle by offering one more reason to live outdoors, with style. The deep research and knowledge of the product, together with a high quality design, craftsmanship and attention to detail, has led, in a short time, to the achievement of excellent results culminated in the creation of fruitful partnerships with some of the most prestigious names in design world including Nicolas Thomkins and Pininfarina. Designer Nicolas Thomkins, known and famous throughout the world for his original signature, iconic design and functional furniture, joined the Higold team in 2014, creating several original projects including the Airport collection, considered as the reference point of the new design trend in the furniture industry. A collection that stands out for the corrugated aluminum sheets inserted in the structure that recall the idea of an old airplane. All made even more perfect, in terms of comfort and design, by the clean lines and embroideries of the cladding. More recently, on the other hand, the collaboration with the Pininfarina design team that has led to the creation of the Onda collection, a collection inspired by the dynamism, elegance and purity of the ocean waves, the empty space created when a wave breaks. A real revolution ready to influence the entire outdoor furniture sector. Large international hotel chains, including Hilton, Sheraton and Jade Beach, have already embraced Higold's corporate mission, creating corners of paradise on their terraces by choosing one or more models from its lines.
