Showcase description

I studied painting and animation in B.A degree and M.A degree. I am interested in painting. digital or on paper with different materials. I did painting on walls in Biennial. And worked with others in some team animations as a compositor and background artist, also have freelance experiences as an illustration in a book and worked with a group in a national book publications in my country. It is much amazing that thinking about new ideas in new concepts. I strongly believe, different software is just material. The ideas are much more important. In general, I can learn different software soon. Now, I am studying Art History of Rome.
