Showcase description

Alexz Alberico Design Studio +39 392 13 90 593 www.alexzdesign.it P.IVA 02082460664 Alessandra Alberico Aka Alexz Alberico I was born in Avezzano, province of L'Aquila in 1987. In 2015 I obtained the Professional specialization in Graphic and Web Design at the International School of Comics based in Naples. I moved to Veneto for work where I still live. During my career I have acquired knowledge and skills within Agencies both as a Web Designer and as a Graphic / Packaging Designer. I currently work independently managing a portfolio of clients from different sectors and as an external collaborator for various realities scattered throughout the country. My work is characterized by a purely minimal and essential style, I always tend to go outside the box, I dare a lot in the design phase of a particular case, most of the time coming out of the standards that we are used to seeing. A risk that I take, a sort of challenge with myself that allows me to increase my level and that most of the time, until now, has proved successful. Working independently allowed me to focus mainly on the fields I love most of my work: Packaging Design and Branding. Thanks to the level achieved over time, I am able to provide my customers with a complete and professional service, able to stand out on the market. The characteristics that distinguish me are the attention to detail, precision and 'cleanliness' in my projects.
