### Showcase description

My name is Giulia Conti. I have just discussed my degree thesis in Intercultural Communication at the University of Milano Bicocca and I will graduate in mid-december. Soon I will start a Master in Communication, Medias and Web Marketing at Uplevel institute of Milan. I'm a 23 years old girl who has a great desire to make new experiences, to get involved and grow professionally. I am a dynamic person with a good spirit of adaptation to new contexts and situations. I like working in a team and being able to compare myself with other people in order to achieve a common goal. I love the digital world, communication (social and relationship). I like very much foreign languages, in fact in high school I studied English, Spanish and German; while during my university years I studied the Japanese language. Currently, having a lot of free time available, I am trying to learn the Dutch language by myself, because in the future I would like to live and work there. From the point of view of work I would like to be able to work in a multinational and manage relationships from a linguistic and interpersonal point of view and also manage the digital/web communication part. I would like to face new management challenges and experience new opportunities. Email Address: [giuliaconti1097@gmail.com](mailto:giuliaconti1097@gmail.com)
