Showcase description

Hi! I am Chiara, I am 20 years old and I am a student of the Academy of Fine Arts in Palermo. I have always experimented with the means at my disposal in all fields of illustration and recently I entered the field of video editing. I throw myself into projects and love being able to talk to my buyers to understand what they want from the product so that I can create something that is perfect for them. I specialize in 2d character designs but I do a little bit of everything having fun and experimenting. I hope this little description has made you interested in my profile! Soon!
