### Showcase description

||| My strange transition to COPYWRITING ||| What led me to copywriting? Is it about money or just passion? It was the summer of 2023 when I first began coding. I used programming platforms such as ATOM and VISUAL CODE STUDIO. I created small projects such as a PERSONAL CV and a SHOPPING LIST. I also started typing quotes on wisdom harnessing my subconscious. So, all led and helped me develop my path to COPYWRITING. I started with emails (short-form copy) and later moved on to learn LANDING PAGES (long-form copy). | MY FIRST COLLABORATION | I had an incredible opportunity to work with a Freelance Coach. He was running an automation for an event dedicated to freelancers. So I composed for him 7 emails (from welcoming to deadline). I later developed other skills such as? EMAIL MARKETING (Selling emails and newsletters). LANDING PAGE (sales pages, opt-in pages, and registration pages for events). FUNNEL (Sales funnels and Lead generation). VIDEO SALES LETTER (Sales pages in video format). ADS (Facebook Ads, Instagram Ads, etc.). CONTENT (E-book). And here is my portfolio?Â?

I work for a mission and in the end, I expect to receive my reward (compensation or commission). And this is what allowed me to continue (even though, there were moments I wanted to give up when getting rejected due to bad copy). If you've made it this far, it means that you either liked my short journey or you don't care at all. Always aim high. Stay strong!
