Internships Available: Si
Qualification: Laurea

Showcase description

Â¨ Simone Carrabetta ? 3D Artist & Product Designer I?m a young designer from the University of Perugia, passionate about 3D modeling, animation, and VFX. I bring products and ideas to life through visuals and animations that blend design, storytelling, and motion. I mainly work with Blender and Rhinoceros, creating photorealistic renders, product animations, rigging, and small VFX productions. Beyond the technical side, I focus on the art direction and visual narrative of each project, crafting content for social media, advertising, and brand communication. I currently work as a freelancer and I?m co-founding a design studio with fellow creatives. Portfolio: simonecarrabetta.framer.website Ã¸ Instagram: @esse_mone
