Years of Experience: >10
Employment Search: Si
Internships Available: No

Showcase description

My name is Jonathan "SEÑOR EKTOR" Goffredo, and I've been a freelance illustrator, motion graphics designer, and graphic designer for over 10 years. After graduating in painting from the Academy of Fine Arts in Lecce in 2009 (Yes, I'm from Puglia ;)), I completed a Master's degree in web and multimedia design at the Scuola Politecnica di Design in Milan. In 2010, I began working in motion graphics at a well-known Milanese studio, which gave me the opportunity to work for prestigious international brands in advertising and TV. After 3 years of active collaboration with the studio, I decided to embark on a freelance career in 2012, working with various studios and agencies in Milan and internationally. I work fluently in 2D and 3D and have skills in compositing, typography, and illustration. Let's chat and find the right solution for your needs! I create both 2D and 3D animated videos, working with clients from concept to final production, thanks to my multi-disciplinary and multi-media expertise; ranging from advertising, web, and major events such as concerts, live events, and TV shows. Some of the services I offer include: Video Post-Production 2D/3D Animated Logos Motion Brand Identity 2D/3D Explainer Videos Infographic Videos 3D Anamorphic Video ADV
