### Showcase description

I am a digital illustrator specializing in a semi-realistic style. My work focuses on portraying characters, expressions, and emotions, using vibrant colors and particular attention to psychological depth and characterization. I have experience creating commissioned illustrations within the role-playing game world, particularly Dungeons & Dragons, which has allowed me to develop strong skills in character design and narrative atmospheres. I am especially interested in working in publishing and the board game industry, where illustration and visual storytelling interact in a structured and meaningful way.
