Showcase description

Started by Samuele Rocco after having collaborated with great firms of the sector, Rocco Giardini acts with a precise objective: to integrate architectures and landscapes to create harmonious universes, with various forms in different places, enjoyable in terms of recreation and contemplation. "When we plan a garden we try to turn in reality the dreams of the clients following all the steps of realization, from the project to the choice of the executive firms of the jobs till the artistic management. Thanks to a software that allows us to visualize the original condition and the final result, we are able to interpret their desires appraising together every particular. A partnership that allows us to express the creativeness and the search that are the strong values of our job, and for this we thank them." www.roccogiardini.it
