Showcase description

Since 1971, we try to make the most of our work: to capture the most important moments of life for all of you. If I told you that these eyes see life in a different light? If I told you that we are lovers of beauty and form, without affecting the emotions that surround us? We saw colors that modern digital sensors do not know, we peeled specimens to be sent to print with surgical attention. We framed hand the moment of a love story, a birth, a discovery. We scalvalcato the time of the film, in rolls of B / W, by playing with the pixels of sensations. We took a classic cut to the sizes and shapes created by the new cut. Continually transform our business processes, but does not change your emotion. And our intent is to make it to the fullest.
