Showcase description

FCVG is a digital advertising agency just like any other. We pocket bribes from production studios, invoice you for our endless Wii games, recycle our oldest and rejected campaigns, sweat our interns, harass yours and constantly look down on everybody (particularly our clients, but also our colleagues if/when they look the other way). Our basic business model is: ? you pay, we do stuff?. Like, digital stuff, you know? Strategic blah blah, creative peacock wheels, tech-jargon and all. And we can also provide your marketing executives with free, ready-made & kinky pick-up lines like: ?crowdsourcing is like R&D meets eCRM with a twist?. FCVG is your next digital advertising agency. Because everybody loves a good looking bastard.
